PROFESSIONAL SUMMARY

Full-Stack Developer with 3.5+ years of experience designing, building and deploying secure web applications for government health programmes, insurance and ERP systems. Strong across the full stack: ASP.NET Core / MVC, Web API, C#, React and SQL Server, with hands-on experience in role-based access control, data reconciliation and fraud detection, bulk data import, financial reporting and cloud deployment. Delivers projects end to end, from requirements to production support, in Agile teams.

CORE SKILLS

Backend: .NET 8, ASP.NET Core, ASP.NET MVC, Web API, Web Forms, Web Services, C#, VB.NET, Entity Framework, ADO.NET, LINQ

Frontend: React.js, AngularJS, JavaScript, jQuery, AJAX, HTML5, CSS3, Bootstrap, charts and data tables

Database: Microsoft SQL Server (T-SQL, stored procedures, functions, migrations), PL/SQL, Firebase

Security: Role-based access control (RBAC), JWT and token authentication, page and action-level permissions

Testing & Tools: xUnit, Vitest, API testing, Git, Visual Studio, IIS / cloud hosting, Crystal Reports

Other: RPA development in C#, SAP ABAP, SDLC, Agile, requirements gathering, team coordination

PROFESSIONAL EXPERIENCE

People's Primary Healthcare Initiative (PPHI) Sindh — Karachi, Pakistan

Manager IT / Lead Developer — *Jun 2026 – Present*

- Design, develop and maintain web applications for PPHI Sindh's health programmes.
- Build features such as user rights, dashboards, bulk data upload and data validation.
- Gather requirements from programme teams and turn them into working software.
- Test, deploy and support applications, fixing issues and improving performance.

Salaam Takaful Limited — Karachi, Pakistan

Senior Software Developer — *Jan 2025 – Jun 2026*

- Led front-end and back-end development across multiple web applications, including the Insurance Management System.
- Owned the full SDLC, from requirements and design to deployment, and managed timelines for on-time delivery.
- Improved application security and performance; researched and introduced new technologies to improve processes.

Software Developer — *Sep 2023 – Dec 2024*

- Developed and maintained ASP.NET applications and designed database structures in SQL Server and PL/SQL.
- Integrated third-party APIs and improved ERP functionality and performance.
- Debugged and optimised code, working with cross-functional teams on system improvements.

EfroTech Services — Karachi, Pakistan

Jr. Software Engineer — *Mar 2023 – Aug 2023*

- Upgraded existing products to ASP.NET Core and modern technologies.
- Enhanced ERP functionality and performance and resolved client requests.

Awesome Technology Inc. — Karachi, Pakistan

ASP.NET Intern — *Dec 2021 – Mar 2022*

- Built front-end and back-end features for public and internal websites with the design team.
- Performed quality assurance testing to find defects and improve usability.

KEY PROJECTS

CCT Mamta — Payment Monitoring & Reconciliation System PPHI Sindh · 2026

Monitoring system for a Government of Sindh maternal health programme that pays an allowance to expectant mothers for their health visits. It makes sure payments reach real patients, not ineligible people.

- Reconciles government payment records against PPHI's verified patient visit records and highlights missing, extra and mismatched entries.
- Detected wrong entries, such as staff entering relatives' names instead of real patients, helping stop payments to ineligible people.
- Bulk file upload through staging tables, so data is validated and compared before it is saved.
- Role-based user rights, leave management, registration and exit of assistants, and a management dashboard.

Technologies: ASP.NET MVC, Bootstrap, SQL Server

The Ledger (TRL) — Rent & Lease Management SaaS Own product · 2026

Multi-client web application for building owners, deployed live and ready for clients.

- Manages buildings, units, tenants and leases, with prorated rent invoicing, payments, receipts, late fees, security deposits and move-out settlements.
- Six financial reports (arrears ageing, collections, tenant statement, billing vs collection, rent roll, maintenance cost) and a KPI dashboard.
- Separate database per client, JWT authentication with refresh tokens, page and action-level user permissions, login throttling and security headers.
- Optimised for slow internet connections.

Technologies: React (Vite), .NET 8 Web API, C#, SQL Server, Entity Framework, xUnit, Vitest

Insurance Management System: Migration & New Features Salaam Takaful Limited

Existing insurance system that I migrated to ASP.NET MVC and extended with new features.

- Migrated the legacy application to ASP.NET MVC.
- Built new underwriting and policy management pages.

Technologies: ASP.NET MVC, C#, Web API, Entity Framework, SQL Server, JavaScript

Approval Workflow System Salaam Takaful Limited

Multi-level approval application where users send requests to approvers, with comments and file attachments, until final approval or rejection.

Technologies: ASP.NET MVC, jQuery, AJAX, JavaScript, Bootstrap, Entity Framework, SQL Server

EDUCATION

Bachelor of Science in Computer Science 2018 – 2023

PAF KIET University, Karachi, Pakistan
